3.30.2011 10:20a.m.

Dimock: Response to a note to call Shawn Garvin and request that he consider the health of the residence and the animals and the land in the area. Concerned about– when the gas company provides potable drinking water to Dimock – does anyone know where that water comes from.

Is this water tested?

In the 1800s there were range waters over clean water (people poisoning waters). This is coming again – they are poisoning the waters – what is going to happen to natural water supply,. You can only live a few days without water.

I'm just one more person, saying to Shawn Garvin, please consider the health of the water, animal, and land.

Ex. 6 - Personal Privacy

Jersey resident - Englewood

Also property upstate ny where they want to do the drilling – and have friends in PA and am concerned about this situation and in our future.

-----where are the water supply companies in all of these actions? She is going to do some research on this, she wants them to become vocal on these issues.
